

Birchwood School of Hawken

2017 Summer Reading Kindergarten

Join the summer reading program at your local library. Designed by professionals in children's literature, summer reading programs encourage students to set reading goals. Incentives are offered along the way as well as rewards once goals are achieved. Developing readers are challenged to steadily read one book after another. It is this continual reading that solidifies skills and an interest in reading that have been developed during the school year. A library program also provides the structure to keep the reading habit in constant progress. Frequent trips to the library are a powerful way to encourage a love of books.

Keep track of your summer reading books on the Kindergarten Summer List that follows and bring it to school on the first day to share with your teachers.

Cuyahoga County Public Library
