

Birchwood School of Hawken's Enrichment Program **Kids Computer Programming using Scratch**

Brand new curriculum

The Scratch curriculum has been completely revamped to accommodate kids who have done this course before. The new curriculum will provide new challenges for more in-depth tinkering.

What is Scratch? It is a programming platform developed by MIT geared toward early childhood. It is used extensively worldwide to introduce computer programming to kids. All relevant concepts of programming language can be demonstrated in Scratch in a very kid-like friendly environment. Almost everything is drag and drop and it can be used to produce very sophisticated programs. Scratch will build the interest in kids and the transition to other programming languages will be seamless.

No prior knowledge of computer programming required. However, kids should know how to use the mouse to navigate around the computer screen.

Class information:

Session: Every Monday beginning Sept 11, 2017 through Nov 13, 2017

(No class on Oct 9)

Who: Students in Grade 1-4

When: Mondays, 3.30pm – 4.30pm

Where: Birchwood School of Hawken

Fee: \$100 per child

Minimum students : 5

Maximum students : 10

If you have any questions regarding the class, please email me at cheokyu@yaho.com

Payment Info:

Paypal: cheokyu@yaho.com or check payable to: Cheok Yuen Ng

Student Name: _____

Grade Level: _____

Guardian/Parent Name:

Email:

By registering the class, I give my permission for my kid to attend the Kids Computer Programming class in Birchwood after school program.
